

Selador™ Series from Times Square Lighting

Paletta™

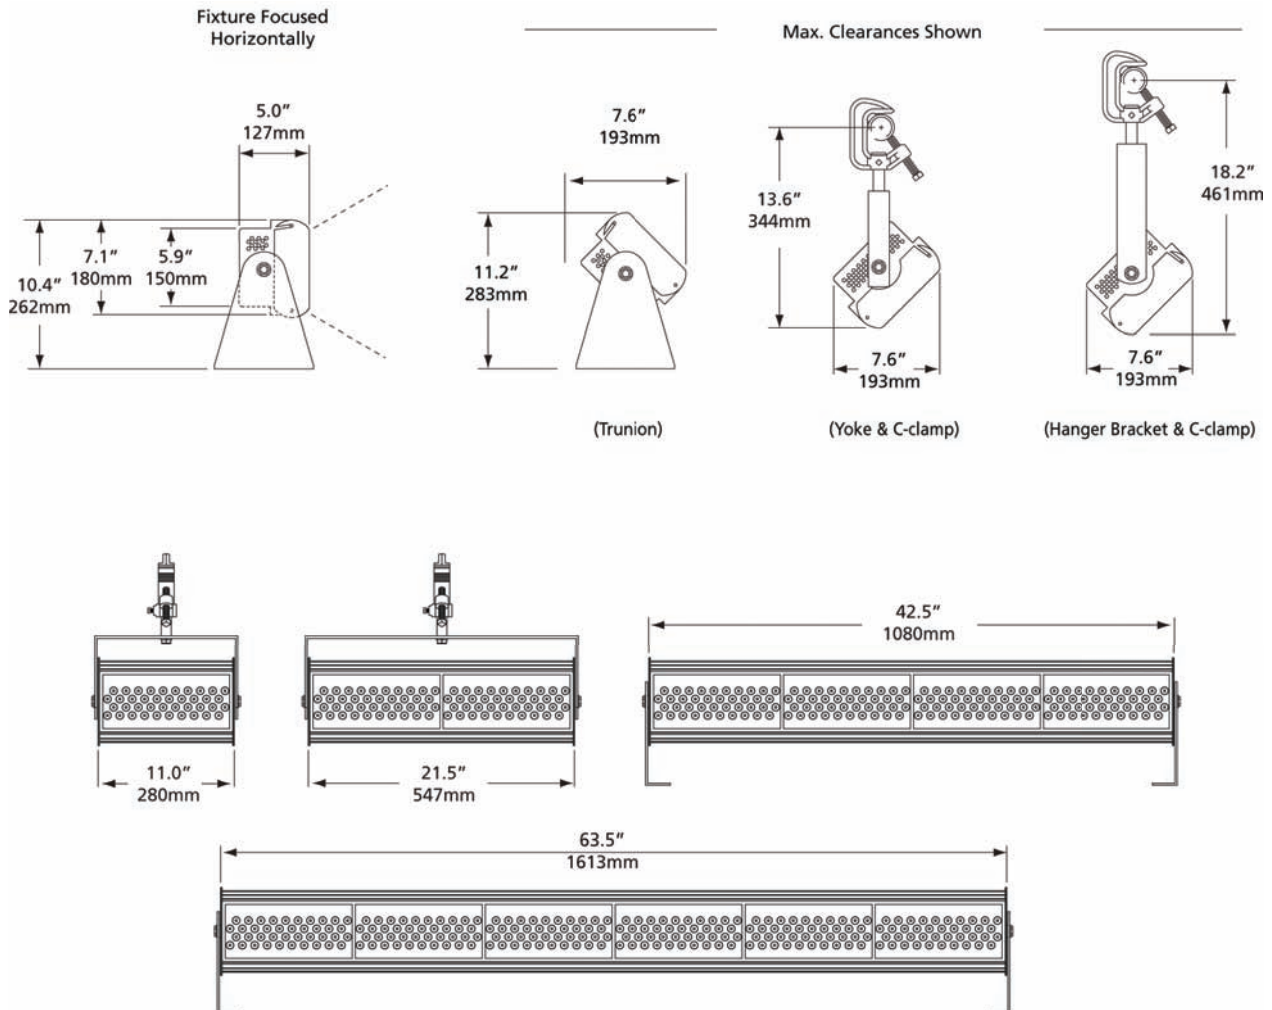

* Four Cell unit shown with optional floor trunnions

The Selador Series medium power, low-profile Paletta fixture is ideal for stage and studio lighting as side light, down light, fill light or cyc lighting – producing the widest range of spectrally balanced saturated and tinted colors that lighting designers love. The Paletta fixture uses the x7 Color System™ configured for the deepest, purest colors and tints available. The exclusive 7-color array maximizes Paletta for deep color output but does not give up Selador Series' unique ability to match match warm, tungsten white light, vibrant daylight white, and soft, tinted gel colors.

Features:

- 2.5W color-mixing LED fixture
- Available in 11", 21", 42", and 63" lengths
- Rugged all-metal extruded housing
- Easy-access slots for secondary lenses
- 50,000 hr. LED life
- Color rendering as high as 90 CRI
- 100VAC to 240V 50/60 Hz universal power input

Available models	
SELPA11	Paletta™ 11" (one cell)
SELPA21	Paletta™ 21" (two cell)
SELPA42	Paletta™ 42" (four cell)
