**GF-600 Linear Lens**  
Glass filter used to spread the light beam in one axis, 5°x50°.

**GF-601 Beam Softener**  
Glass lens conditions light for a softer beam.

**GF-673 Spread Lens**  
Glass filter used to spread the light beam in all directions, 50°x50°.

**GF-702 UV Blocking Filter**  
Prevents ultra-violet light that can cause fading or darkening of colors and/or loss of strength. Useful for the preservation of artwork.

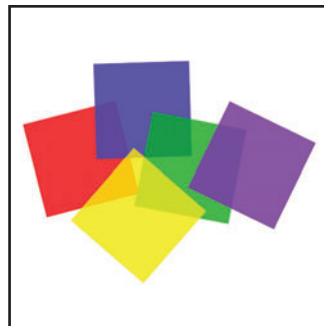

**Fluorescent Sleeves**  
Used to add color to fluorescent lighting and protect against lamp breakage by containing shattered glass. (Available in the same colors as our gel filters.)

*T12 Sleeves*  
OD: 1.71"  
ID: 1.67"  
Length: 46.5"/92.5"

*T8 Sleeves w/ UV filter*  
OD: 1.22"  
ID: 1.18"  
Length: 46.5"/92.5"

*T5 Sleeves w/ UV filter*  
OD: 1.03"  
ID: 0.93"  
Length: 46.5"

**Gel Filters**  
Used to change the color of a projected beam of light.
