Distribution by Times Square Lighting

Connector Strips

Times Square Lighting Connector Strips are custom built to specification and are used to distribute permanent lighting circuits throughout an installation. Exterior dimensions are 3" x 4" at a length of 2' minimum.

Connectors can be flush or pigtailed and come in a variety of styles. Can be mounted vertically or horizontally, dead hung or from moveable rigging systems. Ideal for theatres, television studios or any application requiring connections for portable lighting fixtures.

Features:

- Custom lengths and circuitry
- Variety of connector styles
- Connectors can be flush or pigtailed
- High visibility circuit numbering
- 18-gauge steel construction
- Mounting brackets included
- Shipped in 8' lengths max. wired through and folded

Manufactured in the USA - IBEW

Connectors:

Mounting Hardware:

**Mounting strap holds up to 2" O.D. pipe. Number of sets required is determined by length of connector strip. One 2-piece mounting set is included per every 5' of connector strip ordered.*
